Nothin' But Natural!

While you probably love to spoil your pooch rotten with all of the gourmet goodies you can find in our companion volume, you know that the most important thing for any doggie diet is health. Your pup needs quality ingredients, the right nutritional proportions, and something that will keep him full and satisfied without packing on the pounds. This can be a tough balance to strike, especially when you factor in the work required of you to make the food. As you know, it's super-easy to go pick up those bags and cans of chow every week, but you never know exactly which preservatives go into them and whether or not they're really satisfying your dogs nutritional needs. The only way to be absolutely positive of those things is to make the food yourself.

In order to make homemade dog food easier and more accessible to the everyday busy dog mom or dad, we've assembled a bonus volume of some of the simplest, straightforward recipes for plain ol' kibble, moist food, and treats. Each of these recipes satisfies the 30/30/30 nutritional proportions your dog's body needs to be its best, and each is simple enough to make that you can easily set aside an hour each week to put it together and be prepared for the next seven days. These aren't exotic, gourmet foods that'll have your baby's tummy trying to keep up. They try to mimic the types of food your dog would eat if still in the wild while adding the modern benefits of plaque prevention and dental care.

When your dog is done with dinner, give him a thank you for being such a great buddy by tossing him one of the all-natural treats you'll find toward the end of this special supplement! These snacks are drool-worthy to the max... for your dog, of course.

You'll soon see that one of the best features of these recipes is that many of them can be made and enhanced by ingredients you already have in your cupboards. Even better, several of them can be made entirely from the leftovers you have from your family's dinners over the last week. That saves you money, it cuts down on food waste, and your dog certainly won't complain about getting bits of that succulent roast chicken in her kibble.

So don't crack open that can just yet. Take a quick look through our all-natural, all-easy guide to homemade dog food and experiment with your own cooking savvy. We guarantee it'll be the easiest cooking audience you've ever had!

EASY VEGETARIAN KIBBLE

Category	Serves	Preparation Time	Cooking Time	Experience
Kibble	2 Litres (8 cups)	5 minutes	30 minutes	★

INGREDIENTS

- 1 L (4 c) 3-grain cereal (or above)
- ½ L (2 c) soy flour
- 150 ml (1/2 cup) whole wheat flour
- 15 ml (1 T) bone meal
- 15 ml (1 T) yeast (enriched, if possible)
- 15 ml (1 T) kelp
- 5 ml (1 t) cod liver oil
- 150 ml (1/2 cup) vegetable oil
- 400 IU vitamin E
- 4 eggs

QUICK TIPS

If you can't find vitamin E liquid, try to find gelcaps. They can be easily pierced so the liquid can be squeezed into the mixture, and the measuring is done for you!

PREPARATION & COOKING

Mix dry ingredients until combined, then add wet ingredients and stir until moist. Drop 2 ml (1/2 t) pieces onto greased cookie sheets and bake at 180° (350°F) for 30 minutes. Remove from oven when lightly browned.

Kelp, one of the most common varieties of seaweed, has incredible nutritional impact for both you and your dog.

MULTIGRAIN KIBBLE

Category	Serves	Preparation Time	Cooking Time	Experience

Cottage cheese (or yogurt) provides the protein your dog needs in place of meat.

PREPARATION & COOKING

Mix dry ingredients until well combined. In separate bowl, blend all moist ingredients but water. Slowly fold water into dry mixture, then add remaining moist ingredients and blend thoroughly.

Pour batter into two large, greased cake pans and bake at 180° (350°F) for 45 minutes. Let cool thoroughly, then crumble and break kibble into small, manageable pieces. Store in airtight container in refrigerator.

Category	Serves	Preparation Time	Cooking Time	Experience
Kibble	1 L (4 c)	15 minutes	10 minutes	★

- 1 can tuna fish
- 4 hardboiled eggs, chopped

Stir in remaining ingredients, then pour and spread in greased baking dish. Cook for 10 minutes at 180° (350°F). Let cool before serving and store in airtight container in refrigerator.

The type of potato you use isn't really important. If you're buying one variety for your family, just get a few extra for Fido!

COUNTERFEIT CANNED CHOW

LEFTOVER KIBBLE

Category	Serves	Preparation Time	Cooking Time	Experience
Kibble	8	30 minutes	75 minutes	★★★

- Chicken bones, enough to fill quart bag
- 710 ml (3 c) cooked vegetables
- 710 ml (3 c) meat fat, innards, gravy, and/or juice
- 480 ml (2 c) flour

QUICK TIPS

This recipe can be made entirely from the leftovers you have after feeding the humans in your family. Just start stockpiling each of them in the freezer and make a batch whenever you have enough.

PREPARATION & COOKING

Place bones on rack in bottom of pressure cooker and add three cups water, one cup apple cider vinegar. Cover and set to 10 pounds pressure for one hour. Let cool, then uncover, remove rack, and break up chicken bones using durable spoon or potato masher. Add all leftover ingredients and stir, heating on low. Cook for 15 minutes, then let cool before serving. Store in an airtight container in refrigerator.

The chicken bones in this recipe are pressure cooked and pulverized so their nutritious bone meal can be included in the food. Uncooked chicken bones should never be fed to your dog; bones like the one above are routinely removed from the stomachs of pets who have choked on them.
